Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	09/945,006	EVANS ET AL.	
	Examiner	Art Unit	
	Anthony Stashick	3728	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 November 2004, RCE Filed.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-17 and 42-44 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-17 and 42-44 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 31 August 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 15, 2004 has been entered.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, 8-11, 13-15 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Schroer, Jr. et al. 5,282,326. Schroer, Jr. et al. '326 discloses all the limitations of the claims including the following: an insole 2 having a raised arch support portion (see Figure 5a, area 22) with the peripheral contour of the arch section generally conforming to the longitudinal arch and transverse arch of the plantar surface of a user's foot (see Figures 1 and 3); the peripheral contour is defined by a curve having a first endpoint located on a medial edge of the insole (see Figure 1) generally corresponding to a forward most medial point of the longitudinal arch; a second endpoint located rearward of the first endpoint on the medial edge of the insole (also Figure 1); the curve extends forwardly and laterally (Figure 1) from the first endpoint through a

Art Unit: 3728

point generally corresponding to a midway point between second and third metatarsal heads of the foot and rearwardly along the medial edge of the fifth metatarsal head of the foot then rearwardly and medially to the second endpoint (see Figure 1); the curve extends across a point generally corresponding to a cuboid of the foot; the raised arch support portion forms part of the foot bed (see Figure 3); the raised arch support portion has a maximum height dimension substantially midway between a first metatarsal head and an Astragalus of the human foot (see Figure 3); the raised arch support portion has a maximum height dimension midway between a Tibialis Anticus of the human foot (see Figure 3); the insole has dimensions that generally correspond to a human foot of predetermined size; the insole is capable of supporting substantially all of the plantar surface of the human foot (see Figure 3); a surface layer 12 provided on the upper surface of the foot bed; the foot bed has a hind foot region and a forefoot region and is made of flexible material (see col. 5, line 49-col. 6, line 66).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7, 12 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schroer, Jr. et al. 5,282,326. Schroer, Jr. et al. '326 discloses all the limitations of the claims as noted above. Although Schroer, Jr. et al. '326 does not specifically state the height of the arch support portion, it appears that it would have been a mere matter of design testing an evaluation

Art Unit: 3728

to find what the average height is for the arch portion of a persons foot and use that height to be the support height of the arch support portion since this portion would be used to support the arch of the average user. With respect to claim 16, it is well known in the art of insole making to make the top layer of an insole out of a textile material to aid in giving comfort to wearing the shoe and to aid in wicking away perspiration.

5. Claims 42-44 are rejected under 35 U.S.C. 103(a) as being obvious over Schroer, Jr. et al. 5,282,326 as applied to claim 9 above in view of Official Notice. Schroer, Jr. et al. '326 discloses all the limitations of the claims except for the claimed Shore Hardness, density and Ball Rebound. Official Notice is taken that it is well within the skill of one of ordinary skill in the art to find a material that would meet the desired Shore Hardness density and Ball Rebound to aid in cushion, comfort and stability of the user's foot within the shoe. Therefore, it would have been obvious, to one of ordinary skill in the art at the time the invention was made, to find a polyurethane material that would meet these desired characteristics. Furthermore, since the Ball Rebound value is defined by ASTM, it appears that this would not be inventive, as it is a requirement that has already been set to meet.

Response to Arguments

6. The declaration of inventor J. Pat Evans has been considered. Applicant continues to use the foot to define the positions of the endpoints rather than the insole or portions of the insole. Applicant is not allowed to claim portions of the foot (or any human body part) with respect to the invention, and therefore, this declaration fails to overcome the 35 U.S.C. 112 second paragraph rejection above. Since applicant admits that there is no other way of defining the

Art Unit: 3728

invention than with respect to the foot, this argument will be persuasive in allowing applicant to do so. Applicant argues that Schroer, Jr. et al. does not disclose the positioning of the raised arch support as that claimed by the applicant in the instant application. This argument is not clearly understood. As can be clearly seen when comparing the figures of Schroer, Jr. et al. to that of applicant's invention in Figure 1, the raised portion of Schroer, Jr. et al. appears to be located in the same area, and similarly curved, as that shown by the applicant, thereby reading on the "generally" claimed invention. With respect to applicant's arguments directed to Figure 3 of Schroer, Jr. et al., these arguments are also not clearly understood. When comparing Figure 3 of Schroer, Jr. et al. to Figure 4 of the instant application, the location of the curve appears to be in the same area as that claimed by the applicant. Since Schroer, Jr. et al. when compared to applicant's figures, discloses the supports in the same position as that claimed by the applicant, the figures "read on" the claimed invention. The Figures of Schroer, Jr. et al. show all the limitations in the same areas as that claimed by applicant, thereby meeting the limitations of the claims.

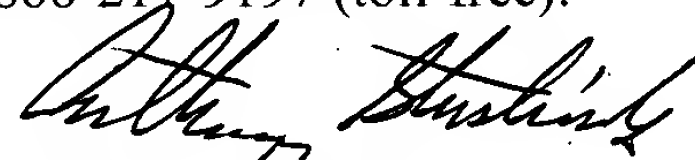

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony Stashick whose telephone number is (571) 272-4561. The examiner can normally be reached on Monday through Thursday from 8:00-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mickey Yu can be reached on (571) 272-4562. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
